

CONCLUSION

MODULE 3

Similarly to the mother, becoming a father also implies being comfortable caring for the baby. As your relationship with your child develops, you will have more confidence and satisfaction assuming your role in the family.

Offer your child love and affection which are more important than material gifts. You will both profit from the bond between you and your child. An attentive and committed father plays an important role in the emotional, social, and mental well-being of his child not only when he or she is small but for the rest of his or her life.
